

-NEWS RELEASE-

Liquid Resins International, Ltd. is pleased to announce a special introductory offer of its new MVP360 Series windshield repair injection system. The MVP360 is the culmination of many hours of research, development and listening to the technicians out in the field. The MVP360 Series includes a modified stainless steel version of the patented Resin Pump, one of the first systems on the market to incorporate true “dry-vac”, a sleek polished aluminum “open” bridge and a palm sized vacuum pump dubbed the Micro-Vac Pump (MVP).

As with Liquid Resins’ original Resin Pump, the MVP360 injector was designed to be used with or without any external vacuum source. The MVP360 injector is crafted from resin compatible stainless steel and contains several modifications from the original

Aside from the MVP360 Injector, Bridge and Micro-Vac, the new MVP360 Series Kwik-Kit includes extra injector tips, a back-up battery powered UV lamp, 1 bottle of Green Cap Resin, 1 bottle of Superhard Pit Resin, 1 Razor Blade Holder, 25 curing sheets, 1 inspection mirror, 1 laminated training step chart, 1 training DVD, 2 cleaning brushes all contained in a handsome compartmentalized carrying case. The foam inserts protect the contents of the kit and keep them organized so that each piece is readily accessible by the tech when needed.

Liquid Resins International, Ltd, located in Olney, Illinois, has been servicing the windshield repair supply needs of the industry for over twenty years and ships to customers in over fifty countries worldwide. Inquiries into the new MVP360 Series can be made by calling 800 458-2098, emailing sales@liquidresins.com, visiting www.liquidresins.com or writing to Liquid Resins International, Ltd, 4295 N Holly Rd, Olney, IL 62450. Visitors are also cordially invited to stop by if ever in the vicinity.
