## **SRP® TOTALSEAL ANNOUNCES NEW BARE METAL PRIMER**

SAVAGE, MN – October 11, 2007 — Shat R Proof Corp. of Savage, MN., is pleased to announce the introduction of the new SRP5055 Bare Metal Primer for use with SRP Totalseal Auto Glass Adhesives.

The SRP5055 is a one-part primer designed to promote bonding between bare metal areas on the pinchweld, larger than 1 inch<sup>2</sup>, and the auto glass adhesive. The SRP5055 will save shops valuable time and money by being a simple in-shop solution for the priming of larger areas of bare metal and aluminum. The SRP5055 will cure in as little as 10 minutes and is compatible with all SRP Totalseal Adhesives.

“The SRP5055 will be a great addition to our existing SRP product line,” says Don Ford, Western U.S. Sales for SRP. “In areas where rust and corrosion is an issue, this primer allows shops to easily prime and seal the pinchweld after the rust removal process is fully completed. It will also aid shops who do a lot of work in body shop situations.”

Shat R Proof Corp. offers products to the auto glass aftermarket, including SRP Totalseal adhesives, Cleaning Products, Windshield Repair Kits, AGR Tools, SRP Glass Restoration products, and SRP/Novus Plastic Polishes.
